

(for your notes)

(your solution)

Largest set of nodes that induces a bipartite subgraph

Largest set of edges that induces a subgraph with 2 connected components

Largest set of nodes that induces a subgraph of maximum degree 2

Largest set of edges that induces a subgraph of maximum degree 2

Set of nodes that induces a 2-regular subgraph

Nodes u and v such that the distance from u to v equals the diameter of the graph

Maximum independent set

Minimum vertex cover

Minimum dominating set

Smallest set of nodes that is both an independent set and a dominating set

Largest set of nodes that is both an independent set and a dominating set

Maximum matching

Minimum edge cover

Smallest set of edges that is both a matching and an edge dominating set

Largest set of edges that is both a matching and an edge dominating set

Minimum edge dominating set that is not a matching
